

## Educator Guide to School/District Reports

The KELPA School & District Score Reports show aggregated performance from the Kansas English Language Proficiency Assessment (KELPA). Score reports can be accessed in Kite® Educator Portal by KELPA administrators under Reports > English Language Learners Assessment.

The bar graphs indicate the distribution of students across levels of Proficiency and Performance by percentage. If a school or district had less than 10 students, no data displays. The first page of the report contains a color key and a description of the overall performance levels and domain performance levels.

① This bar graph shows the distribution of Overall Proficiency (Not Proficient, Nearly Proficient, and Proficient) scores across your organization and Kansas.

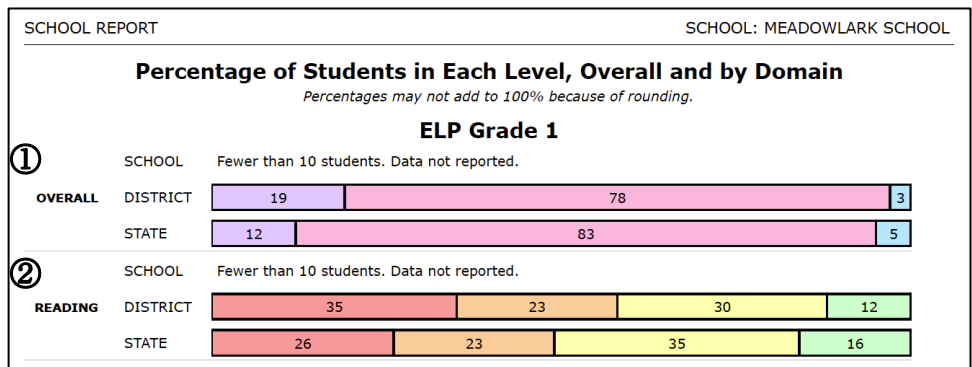

② The bar graphs show the distribution of Domain Performance Levels in reading, writing, speaking, and listening. Level 1, Level 2, Level 3, and Level 4 scores in each grade level across your organization and Kansas.

*Note: If the organization contains fewer than 10 students, data is not reported.*

③ The tables below the bar graphs show the number of students in each performance level, both overall and by domain in each grade level across your organization and Kansas.

④ On the district report, additional tables display the number of students at each performance level, both overall and by domain, at each school across your district.

*Note: If the school has fewer than 10 students, data is not reported.*
